SUMMARY

Passionate Software Engineer with a strong background in MERN Stack. I have hands-on experience building responsive, user-friendly interfaces using React.js, Typescript, and modern UI libraries, while also having some exposure towards backend development with Node.JS and MongoDB. Experienced in API integration, state management, and performance optimization. I thrive in collaborative, agile environments and continuously seek opportunities to learn emerging technologies.

TECHNICAL SKILLS

Programming Languages: ReactJS, JavaScript, Typescript, Python, C++

Backend & Runtime: Node.js, Express.js

Non-Relational Databases (NoSQL): MongoDB

Relational Databases (SQL): MySQL, PostgreSQL

AI Development Tools: ClaudeAI, Cursor

Professional Tools: Asana, Everhour, Pumble

Other Tools: Git

PROJECTS

Lifetime Warranty <i>Frontend Development & API Integration</i> - Developed the complete frontend UI for the Lifetime Warranty platform. - Integrated multiple backend APIs to enable dynamic data rendering and user interactions - Implemented routing, component-based architecture, and responsive UI design - Ensured smooth communication between frontend services and backend endpoints	2025 <i>React, TypeScript, REST APIs</i>
Raise Forward <i>Frontend Development, API Integration, Backend Assistance</i> - Built core frontend UI components and integrated backend APIs for real-time data handling - Assisted in backend implementation and debugging for API endpoints - Implemented routing, authentication flows, and client-side validation - Collaborated with backend systems to maintain efficient data flow across the application	2025 <i>React, TypeScript, Node.js</i>
Static Aquatics <i>Full Frontend UI Development</i> - Developed the entire frontend interface for the Static Aquatics platform - Implemented responsive layouts and reusable UI components - Structured the project with scalable component architecture and routing - Focused on performance optimization and maintainable UI structure	2025 <i>React, TypeScript</i>
Tracy Design - Web <i>Frontend Development, API Integration, Backend Assistance</i> - Developed authentication systems including login, protected routes, and private pages - Integrated APIs for dynamic data handling and frontend-backend communication - Implemented client-side validation and structured routing across multiple pages - Assisted backend development with debugging and integration support	2026 <i>React, TypeScript, Node.js</i>
MyRoster - Director Flow <i>Frontend Development & API Integration</i> - Built authentication screens and director workflow pages for the platform - Implemented routing, validation mechanisms, and protected navigation - Integrated APIs for fetching and managing application data - Ensured smooth user experience through structured frontend architecture	2026 <i>React, TypeScript, REST APIs</i>

Tracy Design - Admin <i>Frontend UI Development</i> • Developed admin authentication screens including login and access control interfaces • Implemented page routing and validation for secure admin access • Designed UI components tailored for administrative workflows • Maintained consistency with the main application design system	2026 React, TypeScript
Service Post - Admin Panel <i>Frontend UI Fixes & API Integration</i> • Implemented UI fixes and improvements across the admin panel • Integrated APIs for newly added pages and backend features • Improved usability and layout consistency across admin interfaces • Ensured stable frontend functionality with backend data services	2025 React, TypeScript
In Search of PowerSports Parts <i>Frontend UI & API Integration</i> • Developed the landing page UI for the PowerSports Parts platform • Integrated APIs to dynamically display product and content data • Implemented responsive layouts for cross-device compatibility • Optimized page structure for improved performance and user experience	2025 React, TypeScript
Clicon E-commerce Store <i>Frontend UI Development</i> • Developed the landing page UI for an e-commerce store interface • Designed reusable UI components following modern frontend practices • Implemented responsive layout and optimized page structure • Focused on user-friendly design and visual consistency	2025 React, TypeScript

EXPERIENCE

MERN Stack Developer <i>Coding Pixel</i> • Developing full-stack web applications using the MERN stack with a focus on scalable frontend architecture • Implementing authentication systems, protected routes, and API integrations for production applications • Collaborating with backend and design teams to deliver responsive, high-performance web platforms	July 2025 – Present
Frontend Engineer <i>IREG-IT</i> • Developed frontend interfaces using React and TypeScript with a focus on usability and performance • Implemented routing, validation, and reusable UI components across multiple pages • Integrated REST APIs to enable dynamic content rendering and efficient data flow	Feb 2025 – Feb 2025
MERN Stack Intern <i>NODLAYS</i> • Assisted in developing full-stack applications using MongoDB, Express.js, React, and Node.js • Implemented frontend components and connected them with backend APIs • Participated in debugging, testing, and improving application performance	Nov 2023 – Jan 2024

EDUCATION

University of Central Punjab <i>B.S. in Computer Science</i>	Lahore, Pakistan 2025
Beaconhouse School System <i>Matriculation in Science (Physics, Chemistry, Maths, Computer)</i>	Lahore, Pakistan 2018

CERTIFICATIONS

- Claude Code in Action - Anthropic
