SUMMARY

Passionate Software Engineer with a strong background in MERN Stack. I have hands-on experience building responsive, user-friendly interfaces using React.js, TypeScript, and modern UI libraries, while also having exposure towards backend development with Node.js and MongoDB. Experienced in API integration, state management, and performance optimization. I thrive in collaborative, agile environments and continuously seek opportunities to learn emerging technologies.

TECHNICAL SKILLS

Programming Languages: ReactJS, JavaScript, TypeScript, Python, C++

Backend & Runtime: Node.js, Express.js

Non-Relational Databases (NoSQL): MongoDB

Relational Databases (SQL): MySQL, PostgreSQL

AI Development Tools: ClaudeAI, Cursor

Professional Tools: Asana, Everhour, Pumble

Other Tools: Git, Rendor, Vercel

PROJECTS

Lifetime Warranty

2025

Frontend Development & API Integration

React, TypeScript, REST APIs

- Developed the frontend UI backend for the Lifetime Warranty platform.
- Integrated multiple backend APIs to enable dynamic data rendering and user interactions.
- Implemented routing, component-based architecture, and responsive UI design.

Raise Forward

2025

Frontend Development, API Integration, Backend Assistance

React, TypeScript, Node.js

- Built core frontend UI components and integrated backend APIs for real-time data handling.
- Assisted in backend implementation and debugging for API endpoints.
- Implemented routing, authentication flows, and client-side validation.

Static Aquatics

2025

Full Frontend UI Development

React, TypeScript

- Developed the entire frontend interface for the Static Aquatics platform.
- Implemented responsive layouts and reusable UI components.
- Structured the project with scalable component architecture and routing.

Tracy Design - Web

2026

Frontend Development, API Integration, Backend Assistance

React, TypeScript, Node.js

- Developed authentication systems including login, protected routes, and private pages.
- Integrated APIs for dynamic data handling and frontend-backend communication.
- Implemented client-side validation and structured routing across multiple pages.

MyRoster - Director Flow

2026

Frontend Development & API Integration

React, TypeScript, REST APIs

- Built authentication screens and director workflow pages for the platform.

- Implemented routing, validation mechanisms, and protected navigation.
- Integrated APIs for fetching and managing application data.

Tracy Design - Admin

2026

Frontend UI Development

React, TypeScript

- Developed admin authentication screens including login and access control interfaces.
- Implemented page routing and validation for secure admin access.
- Designed UI components tailored for administrative workflows.

Service Post - Admin Panel

2025

Frontend UI Fixes & API Integration

React, TypeScript

- Implemented UI fixes and improvements across the admin panel.
- Integrated APIs for newly added pages and backend features.
- Ensured stable frontend functionality with backend data services.

In Search of PowerSports Parts

2025

Frontend UI & API Integration

React, TypeScript

- Developed the landing page UI for the PowerSports Parts platform.
- Integrated APIs to dynamically display product and content data.
- Implemented responsive layouts for cross-device compatibility.

Clicon E-commerce Store

2025

Frontend UI Development

React, TypeScript

- Developed the landing page UI for an e-commerce store interface.
- Designed reusable UI components following modern frontend practices.
- Implemented responsive layout and optimized page structure.

EXPERIENCE

MERN Stack Developer

July 2025 – Present

Coding Pixel

- Developing full-stack web applications using the MERN stack with a focus on scalable frontend architecture.
- Implementing authentication systems, protected routes, and API integrations for production applications.
- Collaborating with backend and design teams to deliver responsive, high-performance web platforms.

Frontend Engineer

Feb 2025 – Feb 2025

IREG-IT

- Developed frontend interfaces using React and TypeScript with a focus on usability and performance.
- Implemented routing, validation, and reusable UI components across multiple pages.
- Integrated REST APIs to enable dynamic content rendering and efficient data flow.

MERN Stack Intern

Nov 2023 – Jan 2024

NODLAYS

- Assisted in developing full-stack applications using MongoDB, Express.js, React, and Node.js.
- Implemented frontend components and connected them with backend APIs.
- Participated in debugging, testing, and improving application performance.

EDUCATION

University of Central Punjab

Lahore, Pakistan

B.S. in Computer Science

2025

Beaconhouse School System

Lahore, Pakistan

Matriculation in Science (Physics, Chemistry, Maths, Computer)

2018

CERTIFICATIONS

Anthropic Education

Claude Code in Action
